Измерительные приборы

The section of measuring instruments includes calipers for panel industry and preset for the correct setting of tools before being mounted on machines.

M. Conti **measuring instruments** are high quality products, which were born at the beginning for the mechanics industry, but over the years they become essential also for woodworking industry. Very useful and performing because they guarantee the highest precision and repeatability.

In this section you can find all kind of calipers for panel measuring, as for example calipers for distance between holes, gauges for linear measurements, gauges for inside/outside measuring, calipers for out of square angle measurements, digital gauges, preset for CNC routers, preset for all kind of tools.
